Summary

AI/ML graduate with practical experience in **Excel, SQL, Power BI, and Tableau**, plus a background in AI/ML projects including a **RAG** based recommendation system. Comfortable taking messy, real world data scraped, incomplete, inconsistent and turning it into something usable: clean datasets, dashboards, and reports.

Professional Experience

Data Analyst Intern, Linengrass

08/2025 – 09/2025

- Scraped hotel data (name, address, amenities, pricing) for Bangalore from multiple websites, collecting **2,200+ of ~2,400** hotels
- Cleaned the dataset, removed duplicates, fixed inconsistent entries, filled in missing values so it could actually be used for analysis and reporting

Delhi

Projects

Healthcare Analytics Dashboard - Power BI, MySQL

- Built a **Power BI** dashboard on a **MySQL** backend tracking patient, physician, and financial **KPIs** across demographics, performance, and revenue.

HR Analytics Dashboard - Tableau

Built a **Tableau** dashboard covering employee demographics, compensation trends, and department-wise performance

Hotel Data Pipeline (Bangalore) - Python, Web Scraping

Wrote scrapers to pull hotel listings across multiple sites, then cleaned and merged the data into one consistent dataset (**2,200+ of ~2,400** hotels)

Fake Job Postings Detection

Developed a **DistilBERT-based binary classifier** to detect fraudulent job postings, achieving **99% accuracy** and **0.96 macro F1** by addressing class imbalance with weighted loss. Engineered a full ML pipeline from EDA and tokenization to fine tuning and evaluation with **TensorBoard integration** and strategic handling of imbalanced data (4.8% fake samples).

Skills

Excel: VLOOKUP, Pivot Tables, Advanced Formulas • **SQL** • **Python:** Pandas, Numpy, Scipy, Tensorflow, matplotlib • **PowerBi** • **Tableau** • **Data Cleaning** • **Web Scraping** •

LangChain/RAG basics

Education

B.Tech in Artificial Intelligence and Machine Learning,
Noida Institute of Engineering and Technology

11/2022 – 05/2026
Greater Noida, UP
